The screenshot shows the File Sync application interface. On the left, there is a 'Configuration' panel with options like 'New', 'Open...', 'Save', and 'Save as...'. Below it is an 'Overview' panel showing a tree view of backup projects and their sizes. The main area is split into two panes for comparison. The left pane shows the source folder '/home/zenju/Desktop/Work' with a list of files and folders. The right pane shows the target folder '/mnt/hgfs/Backup'. A central comparison table lists items from both sides, indicating their status (e.g., changed, new, or identical).
